

**ELE Seminar on
Climate, Forestry,
and Land Use
AREC/ECON/LAW 596b
Dr. Roger Sedjo**

Spring 2009 class offering • Feb 23–Mar 6 • M/W 3–5

This seminar is designed to facilitate the development and exchange of original research on environmental and natural resource topics, including climate change, through discussion, reports, and/or papers. Topics covered will include global carbon markets and America's forests; forests, carbon credits, forest sequestration, and avoided deforestation; land use: forest, agriculture, biofuels and biodiversity competition; the climate problem: evidence and a critique; the Kyoto Protocol: the process, the future; the economics of climate change; and The Stern Report and other estimates.
