MCB 181R/181L: Intro Biology/Lab	4__
PSIO 201: Human Anatomy & Physiology	4__
N SC 101: Intro to Nutrition ²	3__

FSHD THEMATIC OR OTHER MINOR: 18-21 units

Students who major in FSHD go on to careers and further education in a range of fields (e.g., family law, counseling, family medicine, child and family policy). To support those futures, students must complete 18-21 units of an FSHD thematic minor or a minor in another discipline. A thematic minor is developed around a theme identified by the student and advisor, using courses from two or more disciplines. To complete a minor outside of FSHD, students must complete at least 18 units in one course of study in another discipline. Courses used to fulfill the minor cannot be used to fulfill the major requirements.

¹INDV 101 "Structure of Mind & Behavior" may be used in place of PSYC 101.

²NATS 104 "Nutrition, Food & You" may be used in place of N SC 101.

NOTE: 56 units must be university level; 42 of them must be upper division (30 minimum from UA). No more than 64 community college units will be accepted. A minimum of 120 units are required
