

ELOY 2006
COTTON PLANTING DATE ADVISORY

NOTE :

This Station Has Been Removed From The AZMET Network.

An advisory for Eloy is not available due to problems with the station site. This station has been damaged by cattle numerous times in recent months. The resulting costs of labor, travel, repairs and replacement sensors have made this station too expensive to maintain.

The site had degraded to the point where we were no longer able to reliably collect accurate data. The station was dismantled and removed from the site.

We have no data after March 31 2005.

Sorry for the inconvenience.
