

Arizona Agricultural Pesticide Certification Training & Testing

Dine College, Room/Bldg ____
August 29, 2007 - 8 am to 5 pm

This training and testing session is designed for agricultural producers and agency personnel with a focus on vegetation and noxious weed management. The training will review pesticide labeling, application methods, regulations, forest pest control (including noxious weed management) and other important information. Training and two tests will be offered – a general exam (Core) for private applicators working on lands under their management and a forest pest control exam for those managing other lands under private and public ownership. To be certified, participants must pass the exam(s) by getting 70% or better. The Core training will provide 3 Agricultural CEUs for previously certified applicators and the Forest Pest Control training will provide an additional 3 Agricultural CEUs for previously certified applicators (for a total of 6 CEUs). Pre-registration is not necessary. This training/certification is for agricultural pesticide applicators only. It does not include rights of way, structural, or other non-agricultural applications.

Cost: \$10 to cover printing and materials (checks should be made to “University of Arizona”)

It is strongly recommended that attendees purchase and study the following prior to the training/testing:

Arizona Agricultural Pesticide Applicator Training Manual for Certification and Continuing Education

The cost of the study guide is \$10 + \$3 shipping and handling

It is available through the University of Arizona at: 877-763-5315 or on-line at: cals.arizona.edu/pubs/

In addition, the Utah Department of Agriculture and Food has an excellent Forest Pest Control Study Guide available on-line at: ag.utah.gov/plantind/sg_forest.pdf

Agenda
