VWR® Storage Refrigerators with Stainless Steel Doors, 1 to 4°C

Supplier: VWR International

- ✦ Powerful Refrigeration Systems
- ✦ Five-Year Compressor Warranty
- ✦ VWR Two-Year Limited Parts and Labor Warranty

These oversized refrigeration systems have large evaporators and condensers. They are equipped with powerful refrigeration systems and 1.3cm (1/2") evaporator coils for fast cooling. Refrigerator interiors feature white, acrylic anodized aluminum interior walls for a bright, sanitary appearance. Interior walls have coved corners for easy cleaning.

Refrigerators feature 300-series stainless steel doors with recessed handles and an anodized aluminum cabinet for maximum reliability and long life. Solid doors, with high-density, foamed-in-place insulation, provide strong structural support and high energy efficiency. The 300-series stainless steel floors provide increased strength and durability. Refrigerators also feature casters, door locks, and an exterior-mounted dial thermometer. Door locks provide built-in security for valuable contents.

Refrigerators use environmentally friendly, CFC-free insulation and refrigerant. UL listed, CSA certified, and NSF approved.

Temperature Range:	1 to 4°C
Compressor,	
Single-Door Models:	1/3 hp
Double- and Triple-Door Models:	1/2 hp

Ordering Information: Supplied with three fully adjustable shelves behind each door. Optional electronic temperature control (55702-534) is factory-installed and must be specified when ordering; contact your VWR sales representative for details.
