

NATIONWIDE DISSEMINATION OF GET EXCEL TILAPIA IN THE PHILIPPINES

Melchor M. Tayamen

- Objective

- Dissemination of newly improved breed (GET EXCEL TILAPIA) to local farmers nationwide

Tilapia production from 1997-2000 in metric tons (Source 1998-2003, BFAR Profile)

| Year | Quantity (MT) | % Increase (Decrease) |
|------|---------------|-----------------------|
| 2002 | 122,316 | +14.58 |
| 2001 | 106,746 | +29.23 |
| 2000 | 82,601 | +9.49 |
| 1999 | 75,437 | +4.74 |
| 1998 | 72,021 | -21.57 |

Supply/production and demand analysis per region for Tilapia (@ 1.5 kcy) (Fisheries Commodity Road Map for Tilapia, 2002)

| Region | Production (MT) | Requirement (MT) | GAP |
|--------|-----------------|------------------|---------|
| CAR | 2,414 | 2,048 | (366) |
| I | 3,088 | 6,301 | (3,213) |
| II | 4,305 | 4,220 | 85 |
| III | 61,936 | 12,046 | 49,890 |
| IV | 33,286 | 32,589 | 697 |
| V | 5,055 | 7,012 | (1,957) |
| VI | 568 | 9,313 | (8,745) |
| VII | 123 | 8,552 | (8,429) |
| VIII | 103 | 5,416 | (5,313) |
| IX | 1,175 | 4,637 | (3,462) |

Supply/production and demand analysis per region for Tilapia (@ 1.5 kcy) (Fisheries Commodity Road Map for Tilapia, 2002)

| Region | Production (MT) | Requirement (MT) | GAP |
|--------|-----------------|------------------|---------|
| X | 582 | 4,121 | (3,539) |
| XI | 648 | 7,784 | (7,136) |
| XII | 8,432 | 3,897 | 4,535 |
| ARMM | 433 | 3,618 | (3,185) |
| CARAGA | 269 | 3,143 | (2,874) |
| Total | 122,417 | 114,697 | 7,720 |

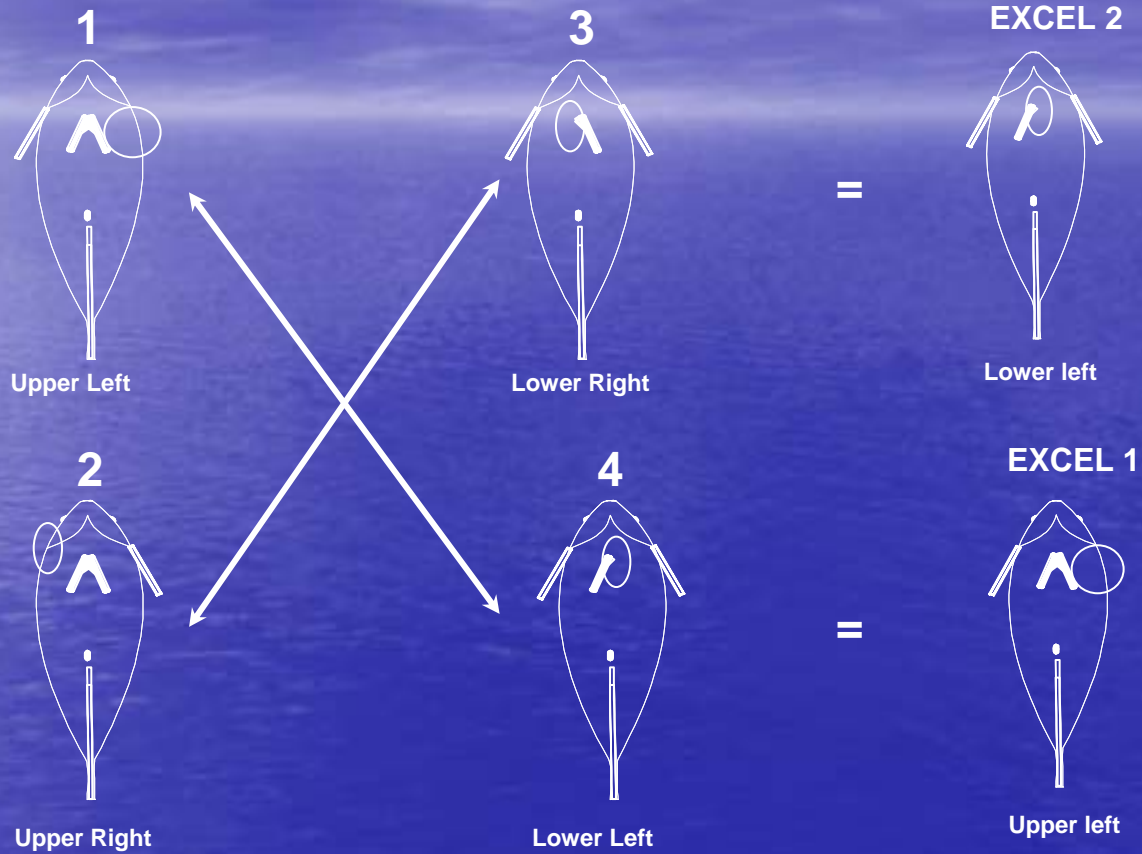

The Four Parent Lines of GET EXCEL Tilapia

- 8th Generation GIFT strain - developed by crossing the best performing genetic groups from eight diverse Nile tilapia strains and their crosses.
- 13th Generation FAC Selected Tilapia (FaST) – a product of within family selection (based on body weight) of *O. niloticus* in a rotational mating scheme.
- Egypt strain – originated from 8 locations in Egypt namely Monsour, Manzalla, Timsah Lake, Ismaillia, Abassa, Mariut, Suez Canal and Idku.
- Kenya strain – progeny of founderstocks collected in 1989 from Lake Turkana.

Dissemination Strategy of GET EXCEL 2002

- Production and Breeding
 - Produced selected lines are bred to bring forth four groups of foundation stocks given to the twelve central hatcheries.
 - The foundation stocks are reared separately by group until large enough to be sexed (about 5 g) and fin clipped.
 - Produced breeders of EXCEL 1 and 2 by central hatcheries are disseminated to provincial/municipal hatcheries and certified/registered private hatcheries which served as satellite station.
 - GET EXCEL 2002 being disseminated to fishfarmers is produced by mating EXCEL 1 and EXCEL 2.

Fish marking used to identify foundation stocks and parent stocks of GET EXCEL 1 and 2.

Legend:

Upper right = Right pectoral fin
Lower right = Right pelvic fin

Upper left = Left pectoral fin
Lower left = Left pelvic fin

- Training

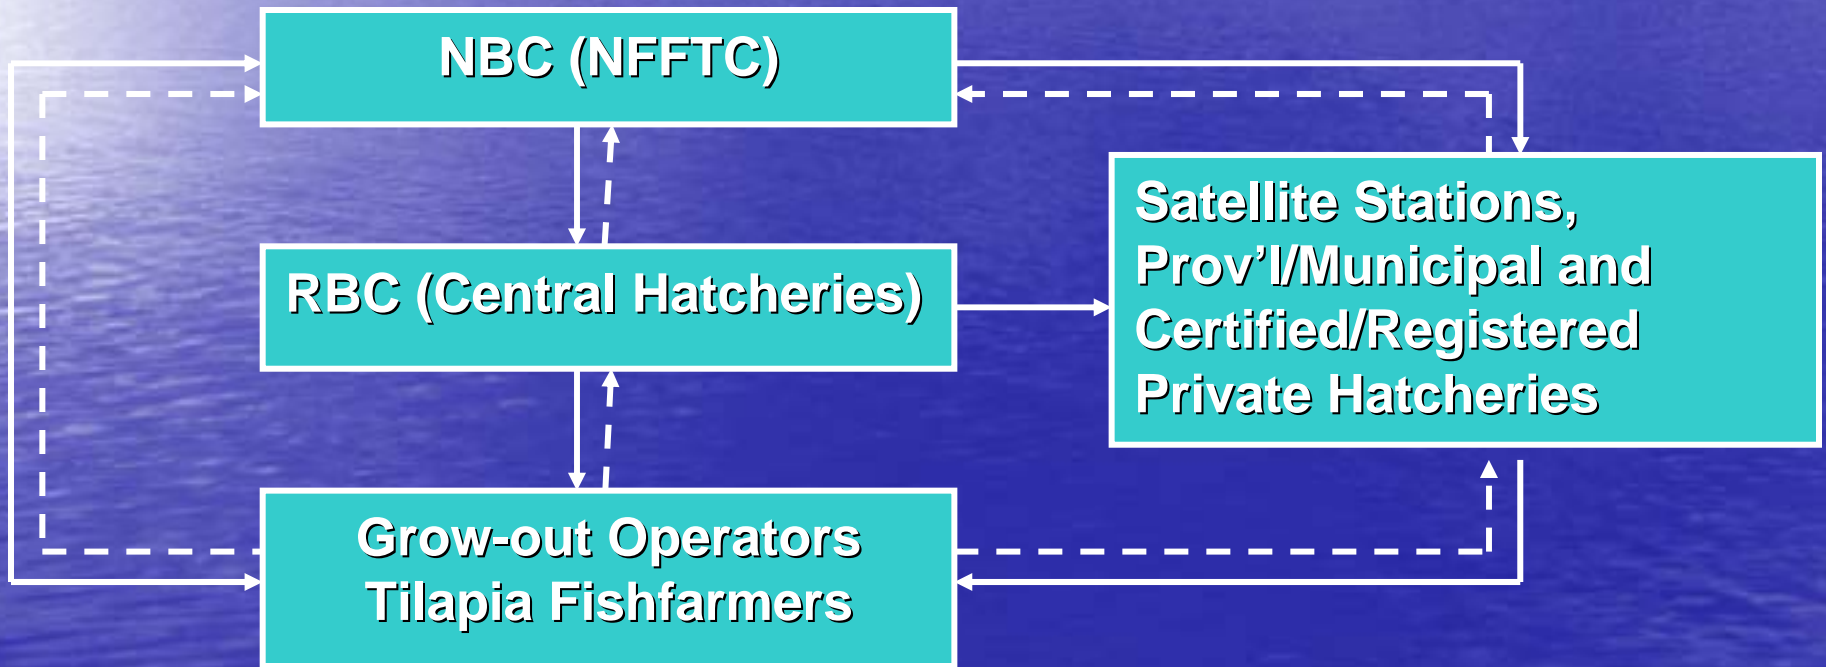

- Hatchery managers, technical staff of ROS/Central hatcheries and the registered/certified private hatcheries are required to undergo training on Breeding and Dissemination of GET EXCEL Tilapia with emphasis on Broodstock Management.

- Evaluation

- Prior to the distribution of Get EXCEL tilapia broodstock an on-site evaluation of all the Central Hatcheries and certified/registered private hatcheries is being done.
- The evaluation team is composed of the Chairman as represented by BFAR Assistant Regional Director and members namely:
 - BFAR Regional Extension Group,
 - Representative Provincial Fishery Officer.
 - Representative from the private hatcheries
 - NFFTC representative (in case applicant is requiring further evaluation)
- Release of broodstock commence after issuance of registration (to applicants who passed the qualification)

• Distribution

- Transfer of Improved Breeds from National Broodstock Center to Multiplier and Grow-out Operators

- BFAR-NFFTC served as National Broodstock Center
- Central Hatcheries serve as Regional Broodstock Center
- Registered Private Hatcheries/Municipal Hatcheries as Satellite Station

SUMMARY

- The fish is now disseminated in central hatcheries and satellite station located strategically in different regions of the country using a well structured dissemination strategy.

**Thank you and
MABUHAY!!!**
