# Rib Bronzing

The image shows two heads of lettuce, likely romaine, laid out on a light-colored, sandy soil. The lettuce on the left is labeled 'Untreated' and has a more compact, slightly wilted appearance. The lettuce on the right is labeled 'Caged Plants' and appears significantly larger, with more vibrant green leaves and a more upright, healthy structure. Both heads have a thick, pale green core. The background is a simple, outdoor setting with natural lighting.

**Untreated**

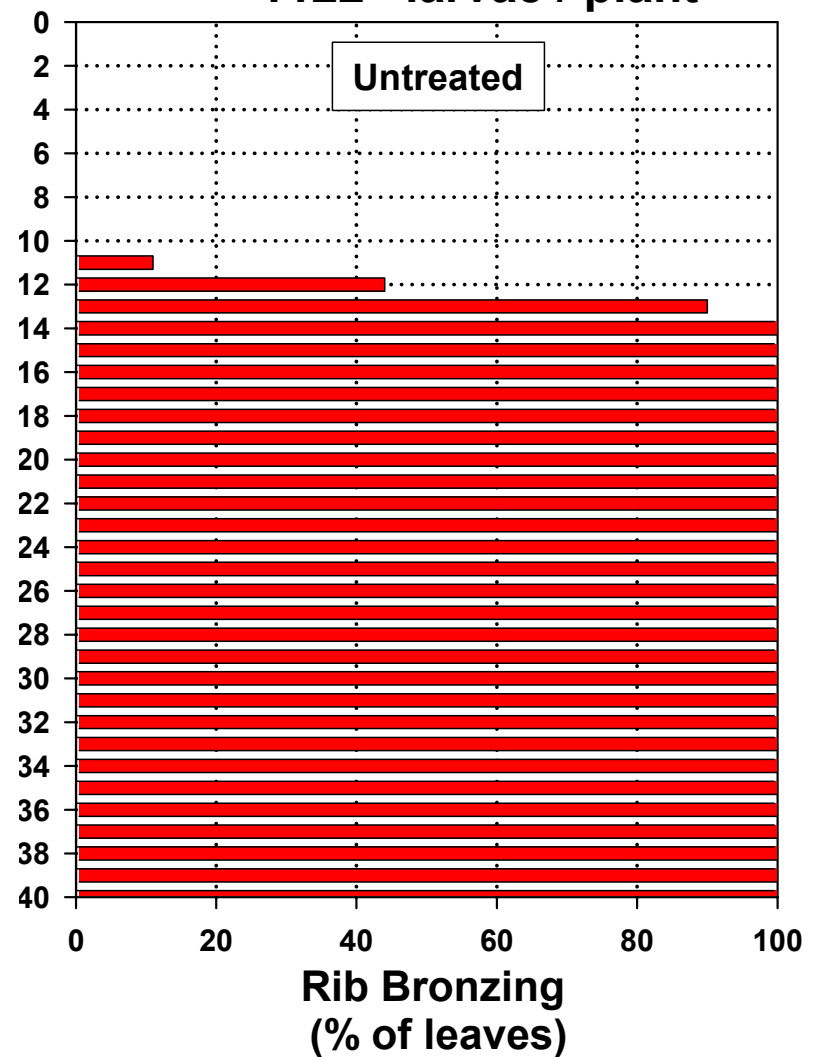

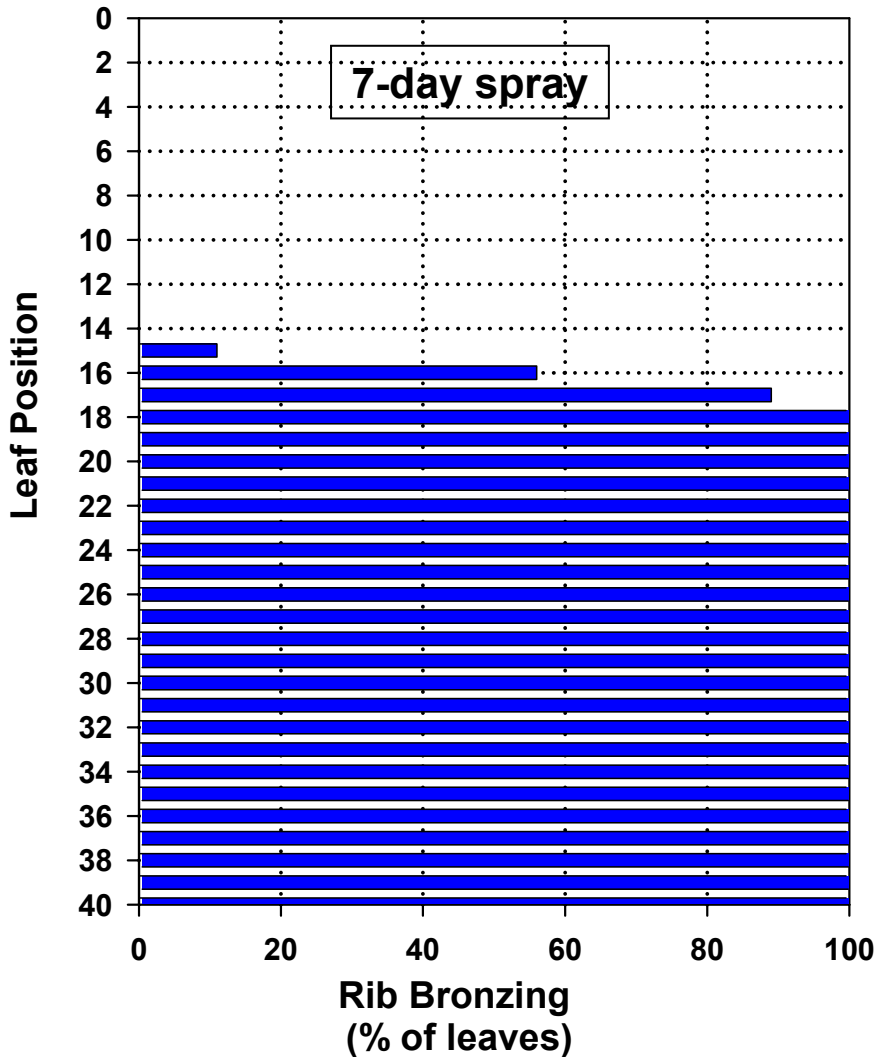

**Caged Plants**
