

# Weed Control

# Herbicides Registered on Major Crops in Arizona

- No herbicide controls all weeds. An integrated approach using cultural practices and more than one herbicide is required

Many weeds cannot compete with  
alfalfa because:

- **Frequent cuttings**
- **Rapid crop regrowth**

- **Proper weed ID**
- **Correct herbicide selection**
- **Proper timing**
- **Adequate rate**

UNTREATED  
CHECK  
DEMONSTRATION

OH  
SHIT!

**Control**

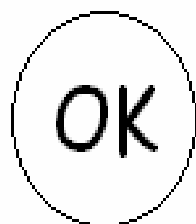

**Partial Control**

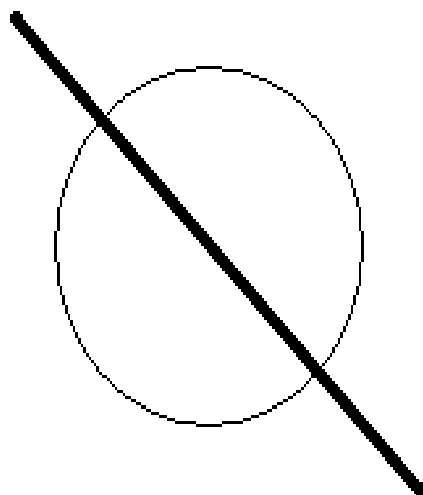

**No Control**
