Bundle of Resources

$$*Economic* = \frac{\textit{Value Output}}{\textit{Value Input}}$$

Comparison Values for SDI

- *Ownership / Installation Costs
(7 configurations)*
- *Annual Operating Costs*
- *Water Use*
- *Yield / Revenue Impacts*

5 plots / 7 Different Systems

Broccoli:

<u>Plot</u>	<u>Bed Config.</u>	<u>Irrig. Freq.</u>	<u>Installation Cost</u>	<u>Annualized Cost 20-yr life</u>	<u>10-yr life</u>
#1	80" drip bed	high	\$2,050.00	\$178.73	\$278.53
#2	40" drip bed	high	\$1,833.00	\$159.81	\$249.05
#3	80" drip bed	low	\$1,947.00	\$169.75	\$264.53

Knowledge & Management??

- *Learning curve for most.*
- *Start on a reasonable scale and grow responsibly.*
- *Risks are very real*
 - 5, 10, or 20 yr life?*
 - yield increase?*

Output Values for Drip

- *Quality / Price Enhancements?*
- *Yield Increase? Market?*
- *Harvesting / Delivery Schedule?*
- *Ground Water Quality?*
